

UORSY Fragments with Solubility

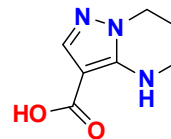

A 880 compounds set selected from **UORSY general fragments** with measured solubility in PBS buffer. The solubility varies from 0.85 to 1.4mM.

PB2027992581

PB2313182247

PB744670718

Physicochemical profiles of **UORSY fragments with solubility**:

130<MW<300; HbA≤3; HbD≤3; logP≤3; RotBonds≤3.

UORSY fragments with solubility are available in stock and could be delivered within 2 weeks in any customer-preferred format: as powders, dry films or DMSO solutions formatted in vials, 96 or 384-well plates. All compounds have a minimum purity of 90% assessed by ¹H NMR; analytical data is provided.
